This website is an attempt to create awareness among Indian nationals about the rampant misuse of 498a (Dowry Law misuse) by unscrupulous women to extort money and harass their husband's entire extended family. This website is dedicated to the victims of gender-biased laws of India (498a and domestic violence against women law) and provides comprehensive and free information about how to protect yourself and take preventive measures to save your family from this law which has been termed as 'legal terrorism' by Honorable Supreme Court of India.

This website also attempts to explain the future disastrous results of badly formulated and gender biased laws [Domestic violence against women law](#) which grossly violates the liberty and dignity of an average man and his extended family members. Anyone who is educated and reads the guidelines of the law can see how vicious this law is and what its social implications are and will be.
